## How to Use IRIVER Live Stream

## Installing IRIVER Live Stream

**Downloading IRIVER Live Stream**

1. Please install the [**IRIVER Live Stream**] app by downloading it from the device's app store.

**Connecting wireless network manually**

1. Select [**Wi-Fi**] by turning the [**Power/Menu**] knob in front of the device.
2. Select [**LS150_xxxxxx**] on the Wi-Fi connection list of the device.
3. Once you enter [**10.10.10.254**] in the browser's address bar, [**LS150 Web Setup Menu**] will appear.
4. If you select the [**Wi-Fi**] tab, you will see a list of APs to which you can connect.
5. Select a desired [**AP**] to connect to the wireless network.
   ○ Additional information such as key index and network key may be required depending on AP settings.
6. You can change AP settings after selecting [**Revise Network**] by pressing the connected AP for a few seconds.

**Connecting automatically using WPS**

1. Please install the [**IRIVER Live Stream**] app by downloading it from the device's app store.
2. Select [**Wi-Fi Setup Wizard**] after executing [**IRIVER Live Stream**].
3. Enter a password and press [**Next**].
4. Press [**Pair/WPS/Scan**] on the upper side of the device, and press [**Next**].
5. Once Wi-Fi network has been connected, you will see a message [**Device is connected to 00000 successfully**] on your device.
6. Once you press [**Next**], IRIVER Live Stream will be executed.

> ⚠ **Connection time may take longer depending on Wi-Fi network.**
> **For detailed instructions on how to use IRIVER Live Stream, please refer to the [IRIVER Live Stream] manual.**
> **You can download the IRIVER Live Stream manual book from [http://www.iriver.com – SUPPORT – DOWNLOAD].**
> **Currently available streaming services include Spotify, TIDAL, QQMusic, vTuner and iHeartRADIO and the list of available streaming services may be expanded or curtailed in the future.**
> **For devices supporting DLNA, you can select devices indicated as [LS150_xxxxxx] on the Wi-Fi list or connect to the same network.**
> **Replay may not be smooth depending on device/computer or Wi-Fi network environment.**

Streaming You can replay songs in real time by connecting to streaming services without the need for downloading music.

- **Spotify :** You can enjoy the streaming service by logging in to a Spotify account (www.spotify.com). Move to a connecting screen and select [Device] or [Family Room].
- **vTuner/TuneIn:** You can enjoy millions of online radio stations all around the world.
- **iHeartRadio :** You can take advantage of this Internet radio service providing programming of more than 800 radio stations.

> ⚠ **Currently available streaming services include Spotify, TIDAL, QQMusic, vTuner and iHeartRADIO and the list of available streaming services may be expanded or curtailed in the future. For instructions on how to use each streaming service, refer to individual ratio stations.**
> **If the streaming service is provided through a fixed URL like Internet radio stations, music is replayed even after the app is terminated. When the connection is resumed through Wi-Fi, music is replayed by connecting automatically.**

# Multi-room

It allows multiple devices connected with IRIVER Live Stream on the same network to replay the same tune so that the listener can listen to stereo sound as if he were in a concert hall.
**How to use Multi-room functionality**

1. Device can be added automatically through WPS or manually.
2. You can replay the same music on different devices if you move to other devices to which you want to connect while pressing the Multi-room-enabled device on [**Device List**].

**Lifting Multi-room functionality**

1. You can lift the Multi-room feature if you move to an empty space on the screen while pressing the Multi-room-enabled device.

> **⚠ Performance can be limited depending on wireless network and device environment.**
> **The multi-room functionality can support up to eight devices.**
> **The multi-room functionality can support sound signals below 16 bits/48 Khz only.**

# Multi-channel

You can replay different songs by controlling a multiple number of devices on IRIVER Live Stream.
**How to Use Multi-channel Functionality**

1. Device can be added automatically through WPS or manually.
2. You can replay by choosing different songs by pressing each device.

# Airplay

**Connecting AirPlay**

1. Select [**WI-Fi**] by turning the [**Power/Menu**] knob of the device and connect to the Wi-Fi network.
2. [ 🖵 ] icon is displayed on the screen of music players on iPhone /iPod Touch/iPad connected to the same network.
3. If you select [**LS150**] after pressing [ 🖵 ] icon, the music file is replayed through the speaker.

> ⓘ **You can also connect AirPlay when the speaker is paired through Bluetooth with iPhone/iPod Touch/iPad.**

Cast Media to Device

**How to Use Windows 10 Cast Media to Device**

You can stream songs on the computer by using the Cast Media to Device functionality of Windows 10.

1. Right-click an audio file on the computer and select [**Cast to Device - LS150_xxxxxx**].
2. Once you see the Windows music player, you can start streaming songs.

> **If the song you want to replay through the Cast Media to Device functionality is connected on Multi-mode through the IRIVER Live Stream app, the functionality won't be supported.**
